Semantic field. The words care, therapy, treatment, and intervention overlap in a semantic field, and thus they can be synonymous depending on context.Moving rightward through that order, the connotative level of holism decreases and the denotative specificity (to concrete instances) increases. Thus, in health care contexts (where its senses are always noncount), the word care tends to imply a ...

Manual coaching by the therapist helps the patient to find the necessary feeling in the body for the desired exercises. Caution: Here, we should add that the hand on the rib hump side must not always grip higher. It depends upon the position of the body. If the torso is positioned vertically, gripping higher means cranially, which would ...
